

DEPLOY ON GITHUB

NEW PROJECT

Create a new project on Github app (**drag and drop folder**)

CREATE GH-PAGES BRANCH

- Create a new branch with the exact name **gh-pages**
- This is the **magic branch** freely served by Github

NOW CODE YOUR WEBSITE

E.g add it an `index.html` page with some content

COMMIT YOUR CHANGES LOCALLY

- Tell git to take a screenshot of your work.
- A screenshot with git is called a **commit**

COMMIT BEST PRACTICES

- Commit every small change as soon as you're proud of it
- Always write **name/description** to explain what you did

DEPLOY

- Hit the **Publish** button (upper right)
- The 1st time, you'll be asked a Github repo name (**no accent, no spaces**)

MAGIC URL

You can now enjoy your website at

`http://GITHUB_USERNAME.github.io/GITHUB_REPO_NAME`
